Introduction to Remote Sensing in Agriculture

Bruce D. Marron

(Course Lecture TIS2)

I. Theme: Agriculture in the 21st C.

Section 02: Introduction to Remote Sensing in Ag

DRAFT

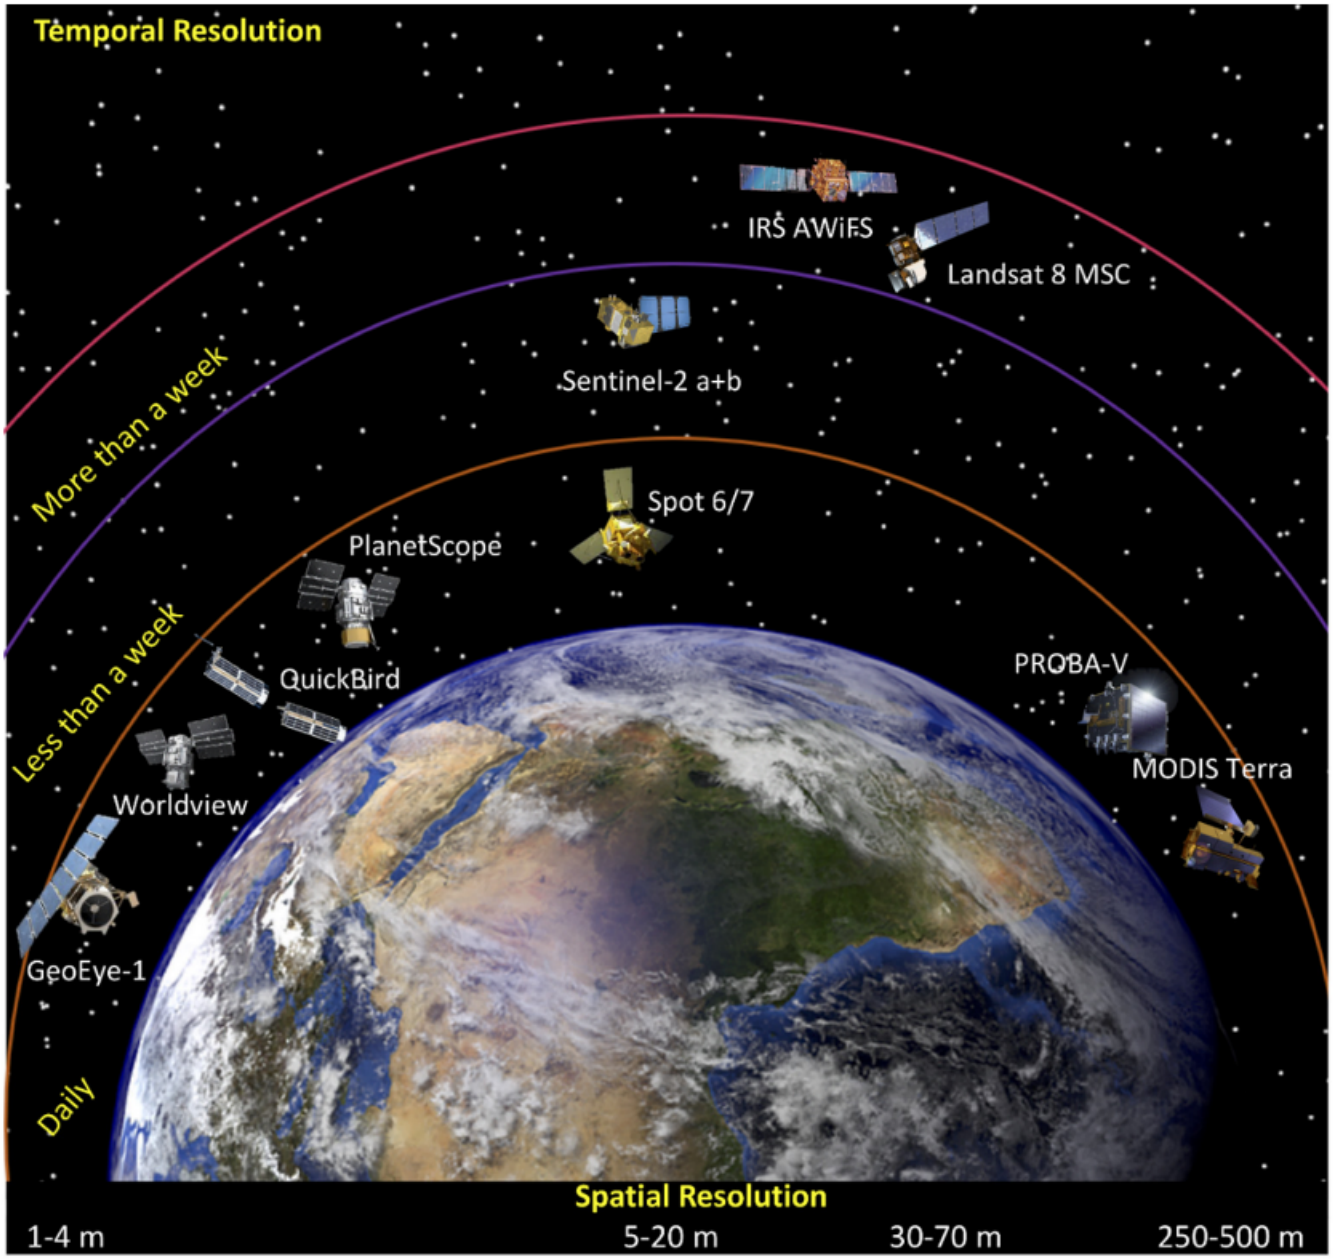

Figure 1. Current constellation of available satellites for land remote sensing that are highly relevant to crop monitoring and management, presented with their temporal and spatial resolution (Segarra et al., 2020)

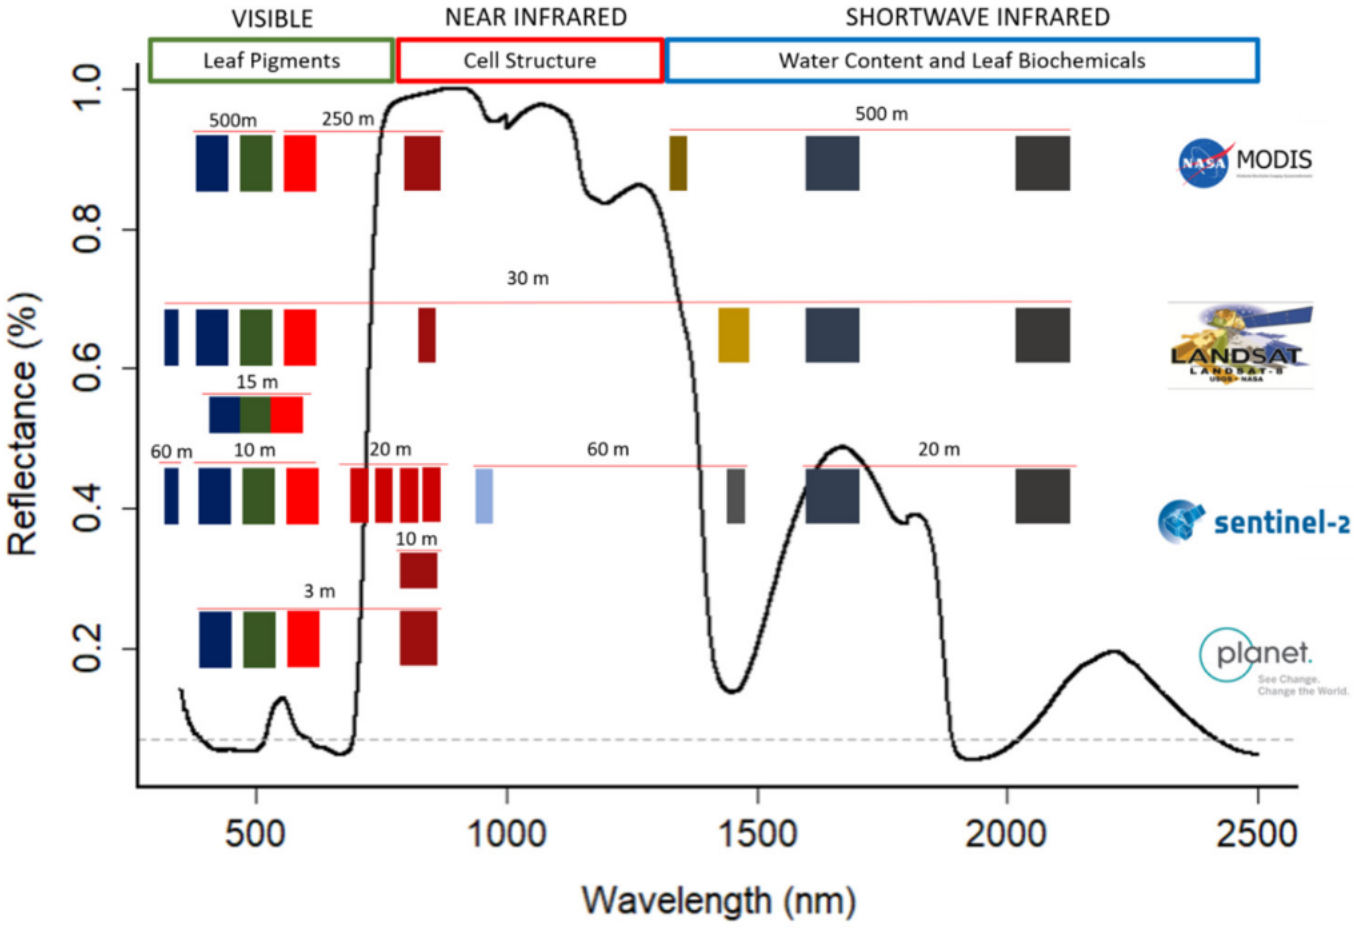

Figure 2. Crop reflectance spectral features, and representation of MODIS (Moderate Resolution Imaging Spectroradiometer), Landsat-8, Sentinel-2, and Planet multispectral bands and spatial resolution (Segarra et al., 2020)

Test

DRAFT

Drones, Drone Data, and Drone Maps
